

# Why System Integrators Need to Cooperate with Ispirer

# What We Do

Automated Database  
and Application Conversion

## Cross-database conversion

We offer migration of data, as well as schema, including SQL objects. We have experience working with more than 20 different RDBMS as a source or target. From Oracle and Microsoft SQL Server to PostgreSQL and MySQL, from Informix and Sybase to Aurora and Azure SQL Database.

## Application modernization

We perform automated conversion from various legacy applications, e.g. Delphi, PowerBuilder, Progress 4GL, Informix 4GL, COBOL to modern technologies, including WEB architecture, provided by the .NET and Java ecosystems.

# Why Partner with Us

We are here for  
the long run

We help our partners create new business and find solutions to their clients' challenges through innovative conversion and modernization technologies. Migration is often an essential phase in the implementation of a customer's project. As an Ispirer partner, armed with our unique products, you will provide your customers with ready-made solutions and services to get past that stage. Together with us, you will be able to transfer databases and applications cheaply, quickly and reliably.

Partnering with us allows you to not only create sustainable business opportunities, but also significantly expand your client base and get involved in the cutting-edge international IT network.

# Business Benefits for Our Partners

## ➤ Increase your customer base

You will be able to innovate at speed, making your products and services more attractive to new customers.

## ➤ Sell more to existing customers

Armed with our products, you get a great opportunity to spark new interest in your existing customers.

## ➤ Stay competitive

An increase in knowledge, expertise and resources can skyrocket your business to great heights.

## ➤ Maintain long-term stability

Through our partnership, you will remain relevant and help your business achieve its objectives and key results.

## Ispirer Toolkit & Services

Accurate and flexible database and application migration software and services.

# How it Works

Software and Services for Database and Application Conversion

Ispirer Toolkit is our software that combines all our best practices for automated database and application conversion. Our single core of intelligent code migration and well-established approach will be extremely useful for you! They will speed up, reduce costs and save overall effort on your modernization projects.

Our Migration Services are also based on the use of Ispirer Toolkit. Conversion automation and the experience of our team allow to offer attractive prices and terms to our customers, and as a result, provide excellent quality outcome.

If necessary, we are ready to perform optimization, develop additional functionality or perform integration with other elements of your infrastructure.

# Our Strengths

Our vision is to be a leading company, providing innovative solutions for highly automated cross-database conversion and human-written program code modernization.

We are particularly recognized for our expertise in these areas.

## **1000+ CUSTOMERS WORLDWIDE**

More than 1000 companies use our software including global corporations from Fortune 500 and Global 2000: Toyota, Epicor, Splice Machine, NTT Data, Continental, Ciber, Staples, NedGraphics.

## **SAVING YOUR RESOURCES**

The conversion process is significantly speeded up through the automation, thus the project is completed within the shortest time period and with your minimal effort.

## **WE ARE ISO CERTIFIED**

We are constantly striving to achieve the highest quality standards for all our operations around the world. Our experts are process-focused and committed to provide the highest quality services.

# Rocket to the next level
